

# Coronavirus

You may have seen our **Airsteril** units around the premises, these were installed to control airborne virus and protect the general environment but they do far more and given current concerns we wish to share this information with you all.

## **SCIENTIFICALLY PROVEN PRODUCTS MADE BY A SPECIALIST IN AIR PURIFICATION**

*AIRsteril technology has been tested against MS-2 coliphage (a surrogate for Norovirus), and achieved significant reductions in counts in both air samples and on surfaces. MS-2 is a nonenveloped virus which is more difficult to kill than the lipid-enveloped SARS-CoV-2.*

Continuously purifying the air, the Airsteril technology is there for the benefit of staff and students alike.
